Enjoy Luxurious Warmth with the Amana® Brand's Premium Furnace

With the premier Amana brand AMVC95 Two-Stage, Variable-Speed Furnace, you will own what we believe to be the best furnace anywhere. Not only will this furnace provide your family with years of reliable warmth in even the harshest of winters, and do so with up to 96% AFUE efficiency—it can also help minimize the temperature swings that can occur from room-to-room—year-round. And it's designed to last and last and last!

Why are we so proud of this furnace? Because a furnace's most critical component is its heat exchanger, and we consider our patented Million-Air™ to be the most durable heat exchanger available. And our SureStart™ Ignition System, another critical component, is comprised of a rugged Silicon Nitride igniter. Then there's its performance. This furnace's two-stage heating technology and variable-speed blower ensure ongoing room-to-room and floor-to-ceiling temperature consistency while achieving one of the best energy efficiency levels around. And the furnace's Auto-Comfort mode helps provide outstanding dehumidification and energy efficiency during every season.

We're so confident in the quality of your Amana brand AMVC95 Variable-Speed Furnace that we back it with a **Lifetime Unit Replacement Limited Warranty*** to the original, registered homeowner for as long as you own your home. Not many companies will go to such lengths to assure you of the quality of their products. But few make a product close to the quality of the Amana brand AMVC95 Variable-Speed Furnace.

Million-Air™ Heat Exchanger

The heart of your Amana brand furnace is its patented Million-Air™ stainless-steel tubular heat exchanger. Formed using our patented, dual-diameter pipe and wrinkle-bend technologies, the Million-Air is built to last. One of these heat exchangers has endured over two million extreme-temperature test cycles in our laboratory and is still going strong. The durability of this heat exchanger is one of the reasons we know your Amana brand furnace will last for years to come.

SureStart™ Ignition System

A long-lasting Silicon Nitride Igniter and our Adaptive Learning Algorithm comprise the Amana brand Furnace's SureStart™ ignition system, which we believe is significantly more durable than the igniters used in many competitors' furnaces.

Energy Efficiency

After product safety and durability, most new furnace buyers are concerned about energy efficiency. A furnace's efficiency can primarily be determined by two factors: its AFUE rating (Annual Fuel Utilization Efficiency), which indicates what percentage of each dollar of natural gas purchased is actually used to heat your home; and the type of blower used in the furnace. Your new Amana brand Variable-Speed Furnace offers up to 96% AFUE, one of the highest AFUE ratings in the industry, meeting the stringent requirements of the Environmental Protection Agency's Energy Star Program. **

And its variable-speed blower makes this furnace even more efficient. The low constant fan setting typically uses as little energy as that needed to run a 100-watt light bulb. As the furnace runs in low-heat capacity, the unit is able to maintain even warmth throughout the house, without high-heat surges. The Amana brand AMVC95 Variable-Speed Furnace is one of the most efficient furnaces we manufacture.

Auto-Comfort Setting

The circulating blower in your furnace plays a role in temperature control in your home year-round —

* Complete warranty details available from your local dealer or at www.amana-hac.com. To receive the 10-Year Parts Limited Warranty and Lifetime Unit Replacement Limited Warranty good for as long as you own your home, online registration must be completed within 60 days of installation. Online registration is not required in California or Quebec.

** ENERGY STAR ratings are dependent upon conditions beyond equipment installation. To make certain your HVAC equipment qualifies for the ENERGY STAR designation, get complete information at www.energystar.gov.

even during cooling season. The Amana brand AMVC95 Variable-Speed Furnace's Auto-Comfort setting provides outstanding humidity and temperature control, while maximizing the efficiency of your system. When the thermostat calls for your heating and air conditioning system to cool, our electronic Auto-Comfort technology increases and decreases the blower's speed gradually to achieve optimal efficiency, excellent dehumidification and quiet operation.

Quiet Performance

Nobody likes being jolted from a deep sleep by a noisy furnace surging on. With your Amana brand AMVC95 Variable-Speed furnace, you can say goodbye to those rude awakenings. Because the furnace typically operates on low capacity most of the time, it produces just 25% of the normal high-fire and circulating blower sound. And to help make our unit as quiet as possible, we fully insulate the furnace cabinet to reduce sound even further.

Built to Last

Your Amana brand AMVC95 Variable-Speed Furnace's cabinet is built using high-quality, leather grain-textured, post-painted steel to resist rust and corrosion. Its elegant design and attractive two-tone Architectural Gray and Executive Gray color scheme complement other Amana brand heating and cooling equipment. And if you choose to add on to your system, the furnace has terminals for both an electronic air cleaner and a humidifier.

Premium Performance

We're so confident in the lasting power of your Amana brand AMVC95 Variable-Speed Furnace that we protect it with what we believe to be some of the best standard warranties* and extended service plans in the industry – including a **Lifetime Unit Replacement Limited Warranty*** for as long as you own your home. If the heat exchanger on this unit fails on the original, registered owner, WE WILL SUPPLY A NEW UNIT FOR FREE. All remaining functional parts are covered by a **10-Year Parts Limited Warranty.***

AsureSM †
EXTENDED SERVICE PLAN

For even greater peace of mind, ask your dealer or visit our web site at www.amana-hac.com for more details about **Asure**SM, an affordable Parts and Labor Extended Service Plan for your entire Amana Brand HVAC system.†

Additional Information

Before purchasing this appliance, read important information about its estimated annual energy consumption, yearly operating cost, or energy efficiency rating that is available from your retailer.

† Extended Service Plans not available in all states. Ask your dealer for full details.

Amana
LASTS AND LASTS AND LASTS.™

Amana Quality

Americans have been relying on long-lasting Amana® brand products since 1934, when Amana, Iowa, native George Foerstner accepted the challenge of building a dependable beverage cooler. Since then, the Amana brand has enjoyed many firsts, including developing the first cold storage locker, being the first manufacturer to nationally market an upright freezer for home use, and introducing the first portable countertop microwave oven.

The residents of Amana, Iowa, began a long history of pioneering and craftsmanship, and that spirit continues today in the manufacturing of quality Amana Heating & Air Conditioning products. From the technology behind our patented Million-Air™ heat exchanger to what we believe to be some of the industry's best warranties to the inclusion of high-quality filter dryers in each of our air conditioners and heat pumps, we remain committed to Amana's legacy of providing consumers with heating and cooling products that are built to last.
